LOGIN FORM USING HTML & CSS

INDEX

Sl. No	Content	Page No.
1	Introduction	1
2	Input Code	1-3
3	Output	4
4	Conclusion	4

1. INTRODUCTION

The Login Form is a web page developed using **HTML** and **CSS**. It is designed to provide a user-friendly interface for users to enter their username and password to access a system. The form resembles the Alliance University Blackboard login page and includes features such as:

- Username input field
- Password input field
- Sign In button
- Forgot Password link
- Third-party sign-in option
- Course Catalog link
- Footer containing Help, Privacy Policy, and Accessibility links

The project demonstrates the use of HTML for page structure and CSS for styling and layout design.

2. INPUT CODE

```
<html>
<head>
  <title>Login Form</title>
  <style>
    #i1, #i2{
      /* margin-left: 10px; */
      border: none;
      border-bottom:2px solid white;
      width: 250px;
      background: transparent;
      font-family: sans-serif;
      font-weight: bold;
    }
    ::placeholder{
```

```

        color: white;
    }
    *{

}
#b1{
    /* margin-left: 10px; */
    width: 250px;
    padding-top: 5px;
    color: white;
    background-color: #333;
    border: 1px solid white;

    /* padding-bottom: 5px; */
}
#b1:hover{
    background-color: white;
    color: black;
}
#h1{
    margin-left: 50px;
}
form{
    text-align: center;
}
img{
    width: 200px;
    height: 200px;
    margin-top: 150px;
}
#p1{
    margin-left: 150px;
    margin-top: 10px;
}
select{
    width: 250px;
    padding-bottom: 5px;
    padding-top: 5px;
    background-color: gray;
}
body{
    background-color: #333;
    color: white;
}
p{

```

```

        text-decoration: underline;
    }
    div{
        display: flex;
        gap: 20px;
        justify-content: center;
        margin-top: -20px;
        color: gray;
    }
    u{
        color: gray;
        font-size: 10px;
    }
    #p2{
        color: gray;
    }
}

</style>
</head>
<body>

    <form>
        <br><br><br><br>
        <!-- <h2 id="h1">Alliance University</h2> -->
        <input id="i1" type="text" placeholder="Username"
name="regno"></input><br><br><br>
        <input id="i2" type="password"
placeholder="password"></input><br><br><br>
        <button id="b1" name="Sign in">sign in</button> <t></t><br>
        <p id="p1">Forgot password?</p><br>
        <select placeholder="Sign in with theird party" name="third-party">
            <center>
                <option>Sign in with theird party</option>
                <option>Alliance Single Sign-On</option>
            </center>
        </select> "><br><br><br><br>

        <p id="p2">View Course Catelog</p><br><br>

        <div>
            <p>Help</p> <p>privacy and Terms of Use </p> <p>Accessibility</p>
        </div>
    </form>
</body>
</html>

```

3. OUTPUT

4. CONCLUSION

This project successfully demonstrates the creation of a responsive and visually appealing login page using HTML and CSS. The design follows a modern dark theme and includes essential login-related components. Through this project, concepts such as form creation, CSS styling, button hover effects, image handling, and page layout design are effectively implemented. The login form can serve as a foundation for integrating backend authentication systems in future web development projects.
