1. INTRODUCTION

The Chess Board project is developed using **HTML** and **CSS** to create a graphical representation of a standard chessboard. The chessboard consists of 64 squares arranged in an 8×8 grid with alternating light and dark colors. Chess pieces are represented using Unicode symbols and positioned in their standard starting locations. This project demonstrates the use of CSS Grid Layout, styling techniques, and web page design concepts to create an interactive and visually appealing chessboard.

2. INPUT CODE

```
<html>
<head>
<title>Chess Board</title>
<style>
  body{
    display:flex;
    justify-content:center;
    align-items:center;
    height:100vh;
    background:#f5f5f5;
  }

  .board{
    display:grid;
    grid-template-columns:repeat(8,80px);
    grid-template-rows:repeat(8,80px);
    border:3px solid #000;
  }

  .cell{
    width:80px;
    height:80px;
    display:flex;
    justify-content:center;
    align-items:center;
```

```

        font-size:50px;
    }

    .light{
        background:#f0d9b5;
    }

    .dark{
        background:#b58863;
    }

    .white{
        color:white;
    }

    .black{
        color:black;
    }
</style>
</head>
<body>

<div class="board">

    <div class="cell dark white"> ♔ </div>
    <div class="cell light white"> ♕ </div>
    <div class="cell dark white"> ♖ </div>
    <div class="cell light white"> ♗ </div>
    <div class="cell dark white"> ♘ </div>
    <div class="cell light white"> ♙ </div>
    <div class="cell dark white"> ♚ </div>
    <div class="cell light white"> ♛ </div>

    <div class="cell light white"> ♜ </div>
    <div class="cell dark white"> ♝ </div>
    <div class="cell light white"> ♞ </div>
    <div class="cell dark white"> ♟ </div>
    <div class="cell light white"> ♠ </div>
    <div class="cell dark white"> ♡ </div>
    <div class="cell light white"> ♢ </div>
    <div class="cell dark white"> ♣ </div>

    <div class="cell dark"></div>
    <div class="cell light"></div>
    <div class="cell dark"></div>
    <div class="cell light"></div>
    <div class="cell dark"></div>
    <div class="cell light"></div>

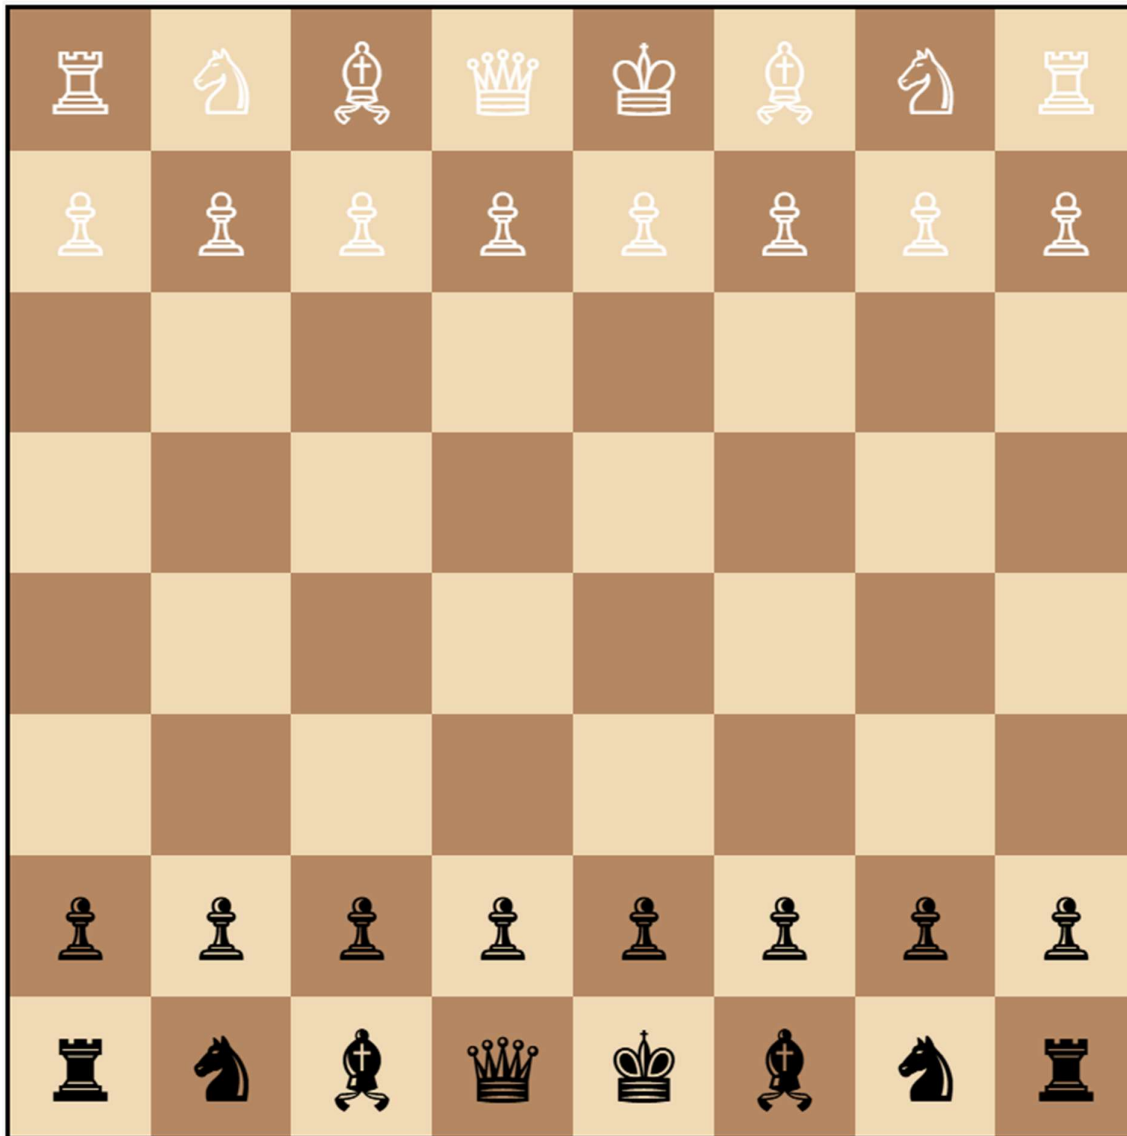

```

</div>

</body>

</html>

3. OUTPUT

4. CONCLUSION

This project successfully demonstrates the creation of a Chess Board using HTML and CSS. By utilizing CSS Grid Layout and Unicode chess characters, a visually accurate chessboard is developed without the need for images. The project helps in understanding web layout design, CSS styling, grid systems, and the implementation of structured graphical interfaces using front-end technologies.
