Design an Employee ID Card Using HTML and CSS

INDEX

Sl. No	Content	Page No.
1	Introduction	1
2	Input Code	1-3
3	Output	3
4	Conclusion	4

1. INTRODUCTION

The **Employee ID Card** project is developed using **HTML** and **CSS** to design a professional employee identification card. The ID card contains employee details such as name, designation, employee ID, email address, phone number, photograph, company name, and barcode. CSS styling is used to create an attractive layout with gradients, borders, rounded corners, and proper alignment. This project helps in understanding web page layout design, styling techniques, and card-based user interface development.

2. INPUT CODE

```
<html>
<head>
  <title>Employee Id Card</title>
  <style>
    h1 {
      text-align: center;
    }
    .parent {
      width: 300px;
      height: 500px;
      background: linear-gradient(360deg ,rgb(165, 137, 137), rgb(92, 92, 136),
      rgb(139, 139, 97));
      margin-left: 485px;
      border: 1px solid black;
      border-radius: 10px;
    }
    .child {
      width: 240px;
      height: 430px;
      background-color: white;
      border-radius: 10px;
      margin-left: 30px;
      margin-top: 40px;
    }
    .sub {
```

```

        background-color: rgb(31, 31, 99);
        width: 240px;
        height: 70px;
        border-top-left-radius: 10px;
        border-top-right-radius: 10px;
    }
    h3{
        color: white;
        text-align: center;
        padding-top: 10px;

    }
    img{
        width: 100px;
        height: 100px;
        margin-top: 20px;
        margin-left: 70px;
        border-radius: 10px;
        border: 1px solid black;
    }
    h2{
        text-align: center;
    }
    .c{
        text-align: center;
        background-color: rgb(213, 216, 47);
        width: 150px;
        margin-left: 45px;
    }
    .d{
        margin-left: 20px;
    }
    .barcode{
        width: 150px;
        height: 30px;
        margin-left: 45px;
        margin-top: -10px;
    }
</style>
</head>
<body>
    <h1>Employee Id Card</h1>
    <div class="parent">
        <!-- <div class="c1"></div>
        <div class="c2"></div> -->
        <div class="child">
            <div class="sub">
                <h3>Micro<br> Chip</h3>
            </div>

```

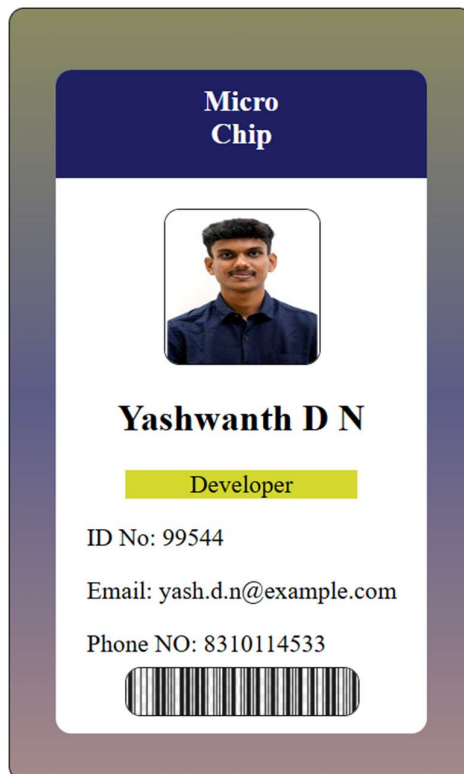

```

        
        <h2>Yashwanth D N</h2>
        <P class="c">Developer</P>
        <P class="d">ID No: 99544</P>
        <P class="d">Email: yash.d.n@example.com</P>
        <P class="d">Phone NO: 8310114533</P>
        
    </div>
</div>
</body>
</html>

```

3. OUTPUT

Employee Id Card

4. CONCLUSION

This project successfully demonstrates the creation of an Employee ID Card using HTML and CSS. It showcases the use of web design concepts such as gradients, positioning, alignment, image handling, and card layouts. The project provides practical experience in designing professional user interfaces and can be extended further by integrating dynamic data using JavaScript or backend technologies.
